COMPANIES OVERVIEW

Combining Independent Inspection
Excellence with World-Class IRM
Solutions

NWE Group is a Norwegian independent third-party inspection and engineering company, delivering engineering assessment, proven inspection expertise, and globally certified solutions to enhance asset integrity, reduce risk, and support confident decision-making. Accredited in Norway to ISO/IEC 17020, NWE operates as an independent third-party inspection body.

As your trusted partner, we provide high-quality inspection, repair, and maintenance (IRM) solutions worldwide to the offshore, onshore, and marine industries. Using highly skilled rope access technicians, we eliminate the need for conventional scaffolding, minimize downtime, and deliver safe, efficient, and cost-effective solutions without compromising quality..

A TURNKEY SOLUTION

NWE + CELER = Turnkey Solution

Together: Subsea → Ground level → Highest structural elevation

Complete asset integrity from the seabed to the top of the structure — NWE's accredited inspection expertise combined with CELER's specialist rope access capabilities delivers a single, seamless solution for clients who need full-coverage asset integrity management without managing multiple contractors.

NWE INSPECTION SERVICES

1

NDT AUDIT FOR INSPECTIONS

At NWE, we focus on delivering NDT audit, monitoring, and supervision services, rather than performing the tests ourselves. Our independent audits ensure compliance with international standards, validate welding quality, and safeguard asset integrity

4

IN-SERVICE INSPECTION

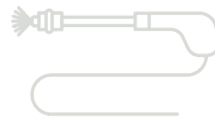

On-stream and turnaround inspections for pressure vessels, piping, tanks, and heat exchangers, using targeted NDT (VT, UT, PMI, Hardness, MT, PT & RT) with graded defect reporting, calibrated measurements, photo documentation, and actionable recommendations.

2

WELDING ENGINEERING & INSPECTION

Certified welding engineering and NDT oversight ensuring ASME, ISO, EN, project specification compliance, and PED-qualified PQRs.

3

UNDERWATER INSPECTION

NWE provides independent UWILD and underwater inspection services using a Norwegian-made Mini ROV to assess the condition and integrity of vessels, submerged structures, and offshore assets, ensuring safe and reliable operations.

5

VENDOR & SOURCE INSPECTION

Independent inspection services to verify quality, compliance, and supplier performance throughout the manufacturing process.

CELER ROPE ACCESS SERVICES

1

MECHANICAL

- Mechanical fitters
- Pipe fitters
- Rotating equipment technicians
- Valve technicians
- Bolting and flange management technicians
- LGI (Lifting Gear Inspections)

2

FABRIC MAINTENANCE

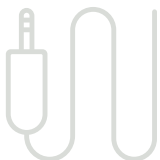

- Painters and blasters
- Insulation technicians
- Passive Fire Protection (PFP) applicators

3

ELECTRICAL & INSTRUMENTATION

- Electricians
- Instrument technicians
- Telecom technicians
- Fiber optic technicians
- Certified CompEx 1 – 4 & APEX Electricians
- EX Inspections carried via AI.

4

STRUCTURAL

- Structural steel fitters
- Welders (MIG, MAG, TIG, FCAW, MMA)
- Fabricators
- Riggers
- OPITO approved level 3/4 Riggers
- Our 6G and 6GR welders are coded to ASME IX and ISO 9606 standards
